BRAINSTORM DISCUSSION GUIDE

BEFORE THE FILM

Filmmaker Stacia Kalinoski is sharing her personal story to help everyone understand epilepsy better — not just the general public, but school staff, emergency responders and medical professionals. Stacia hopes through education, she can help reduce the stigma surrounding epilepsy.

1. What do you know about epilepsy at this point?
2. Would you be able to recognize the multiple types of seizures?
3. Do you feel epilepsy has a stigma? Why?
4. How many people in the room have been touched somehow by epilepsy?
5. Have you ever witnessed a seizure? If so, what did it look like?
